

WELCOME TO YOUR BEST BED EVER.

@Last was introduced in 2012 after seeing a lack of quality in the sleep systems being put on the market, that are wrapped in slick and clever advertising campaigns. Unlike these mediocre mass-produced mattresses, **@Last** products are tested extensively to retain feel and reduce unwanted impressions far longer than the typical national brands.

@Last is a family of sleep products designed to address varying needs and comfort levels, while providing the best wear available for the support level chosen.

Congratulations on your investment in better sleep!

THANK YOU FOR CHOOSING @Last AS YOUR FOUNDATION FOR A HEALTHY LIFE.

Did you know that your sleeping environment can play a huge part in how well you sleep? Here are some tips to turn your bedroom into your own personal Sleep Retreat.

1. Keep your room dark and cool.

Dim your lights to encourage your body to ease into nighttime. Stop using electronics at least 30 minutes before bed. Keep your room cool; 65 degrees is the ideal temperature. Having a dark and cool bedroom will prepare you for a restful night.

2. Keep your room quiet.

Is it too noisy outside? Try a white noise generator. White noise creates a constant ambient noise that will block out the occasional outside noises that can disturb your sleep.

3. Keep your room calm.

Aroma plays a large part in helping you relax and stay asleep. Research shows that the scent of lavender eases anxiety and insomnia. In one study, lavender helped improve quality of sleep by 20%.
